

ABOUT ME

I'm Nicolas Pichon, a multidisciplinary designer based in Amsterdam. I create and conceptualize ideas, pitch treatments, develop looks, and design projects. I have a deep passion for design, with a specialization in accessories. Each bag is uniquely designed with a global perspective, focusing on creativity, quality, and functionality. Understanding product design means realizing that no detail can be neglected; the outcome depends on everything being well-designed and perfectly manufactured. My mission is to provide designs that generate unique experiences and create products that transform everyday life.
